

Aggrey Muhebwa is graduating with a Master of Science degree in Electrical and Computer Engineering with a concentration in Machine Learning and Big Data Analytics.

At CMU, he headed the analytics team of the data science club. Together with two of his peers, he organized the first Artificial Intelligence summer boot camp in Kigali last year. Aggrey has also been a Teaching Assistant for the majority of Machine Learning and Data Science courses.

Earlier this year, Aggrey and his team won the African inter-University grand challenge in technology, earning a cash prize and a summer internship at Merck Sharpe and Dome IT Hub in Prague, Czech Republic. He got to spend a semester at the Pittsburgh campus last fall, where he completed his master's program.

Aggrey holds a Bachelor of Science degree in Computer Engineering with a focus on Software Engineering and Signal Processing from Makerere University. Prior to joining CMU, he worked as a Machine Learning Engineer at Grameen Foundation Innovation Labs and as a Software Engineer at Mountbatten Limited.
